Dear Mr Massyn

RE PTH WATER CONDITIONER AND DESCALER vs CHICKEN INDUSTRY

You supplied us with an in-line 2-inch chemical fee water improver.

**We also use borehole water on the farm, and I have pleasure in reporting as follows:
Neil Taylor**

MANAGER: MALAN CHICKS

CELL 083 656 2896

- 1. The entire farm's water is being treated with the PTH unit. All the drippers for the thousands of chickens remain clean and free of scale and rust.**
- 2. The oxygen enriching system used for the improved growth of the chicken remains unaffected by the hard borehole water and continues to function optimally.**
- 3. The existing 20-year old piping system is gradually being cleaned up, with fragments of loosened scale washed out.**

We found that the PTH saves us money that would have been lost otherwise spent on maintenance, materials and lost man-hours due to breakdowns normally caused by hard water.

I can recommend the PTH as a quality product to all users of borehole water.

Your sincerely.
